CellStream Inc. Training

Customer Attendance List

Disclaimer

The following report is a list of companies that have sent students to our various training programs at CellStream Inc. The contents of this list will be updated from time to time. No private information containing specific student information, number of students, class types, or any other details will be provided. We offer this list for reference purposes only.

References

CellStream offers a variety of [Learning Services](#). We follow the [Bloom's Taxonomy](#) approach to professional learning. You can click on either of the links to explore more details.

Evolving the Service Provider networks is crucial to the evolution to next generation networking. Some people have written off service providers as "boat anchors" with "legacy technology". At CellStream we see the service providers as poised to move forward, with many already taking bold steps toward Voice over IP, Video over IP, Wireless, High Speed Ethernet Access (wireless and wireline). For many, this evolution seems daunting without a clear understanding of the technologies. For this reason CellStream consultants have been at the forefront of technology training and consulting for service providers, especially the flexible and talented Independent Telco teams.

CellStream has created a ["Service Provider" curriculum](#) that combines one-day workshops for managers and supervisors.

For a complete list of CellStream Inc. courses, you can [click here](#).

A Special Thanks

We would like to thank our customers for their continued support and investment in their employee's knowledge training. We also thank the students for their focus and commitment to furthering their knowledge and skills. Helping others brings all of us at CellStream great pride and fulfillment.
